**Situation**
The behavioral health, OUD, and SUD workforce gap
Opiate use crisis
Gaps in prevention, early intervention, treatment and recovery support for SUD and OUD
Limited evidence-based care and prevention for addiction disorders
Infrastructure is disparate and poorly coordinated, but state is moving toward integrated care
Behavioral, OUD and SUD clients usually access care via primary physician
Rural and medically underserved

**Priorities**
Serving diverse life-span groups
Systemic, sustainable change
Integrative models of care
PSU’s support
PSU’s undergraduate and graduate behavioral health and primary care programs’ faculty, staff and students
Support of existing state laws and policies
Federally Qualifying Health Center (FQHC) internship positions at our four new sites
Federal funding

**Inputs**
*What we invest*

**Outputs**
*What we do*
Recruit students interested in pursuing a master’s-level degree in counseling with a focus on addiction treatment
Create and implement interdisciplinary courses for students and professionals in evidence-based assessment and care for OUD and SUD
Develop addictions treatment certificate for graduate-level students
Provide professional development for students, professionals, and university faculty regarding SUD, OUD and MAT
Place interns at FQHC sites and provide them with intensive, high-quality supervision in evidence-based care

**Who we reach**

**Behavioral and primary health undergrad students**

**Outcomes**

**Short**
More behavioral and primary healthcare students aimed at treating SUD and OUD
Establishment of FQHC internship sites
Behavioral health and SUD/OUD treatment providers brought together
More behavioral and primary healthcare workers in the state trained to treat OUD and SUD (including with MAT)
More public awareness of how to access treatment for behavioral health, OUD and SUD

**Medium**
More behavioral and primary healthcare students aimed at treating SUD and OUD

**Long**
Behavioral and primary health undergrad students

People who suffer from OUD, SUD, and their community

Health of the populations of NH are improved regarding OUD and SUD
